PROFESSIONAL SUMMARY

Full Stack Software Engineer and **Smart India Hackathon 2025 winner** with hands-on experience in full-stack development using **MERN stack** and **Java** (Spring Boot). Proficient in building scalable web applications, REST APIs, and AI-driven systems, with a strong foundation in data structures and object-oriented programming. Eager to contribute to real-world software development as a **Software Developer**.

SKILLS

- **Programming Languages:** Java, JavaScript
- **Frontend:** HTML, CSS, React.js
- **Backend:** Node.js, Express.js, Spring Boot, REST APIs
- **Databases:** PostgreSQL, MongoDB
- **Tools & Concepts:** Git Version Control, Docker, VS Code, OOP, SDLC, Agile, CI/CD(basics)

EXPERIENCE

Full Stack Developer Intern – Conprg Technologies (OPC), Chennai

Dec 2025 – Present

- Developed and integrated backend functionalities for a **Manpower Outsourcing System**, improving workflow efficiency for internal operations
- Built and tested **REST APIs** using ASP.NET core, enabling seamless communication between frontend and backend modules
- Designed responsive UI components using **React**, enhancing user experience and reducing interface load time by **20%**
- Performed database operations and query optimization in **PostgreSQL**, improving data retrieval performance by **15–20%**
- Debugged and resolved **10+ functional issues**, increasing application stability and reducing runtime errors

PROJECTS

Money Manager App

- Built a **full-stack personal finance tracker** with real-time income/expense logging, enabling users to monitor cash flow through an intuitive, responsive interface.
- Developed **RESTful CRUD APIs** backed by MongoDB for efficient document storage, supporting dynamic financial categorization and sub-100ms query response times.

Event Ticketing and Registration System

- Designed a **microservices-based event booking platform** with independently deployable services for registration, payment, and ticketing, improving scalability and fault isolation
- Built **Spring Boot REST APIs** integrated with PostgreSQL for efficient concurrent booking management
- Implemented a **QR-based ticket verification workflow** enabling real-time, contactless check-ins at events and eliminating manual validation bottlenecks

VEXTA – Personalized IDP Generator

- Architected an **AI-driven full-stack platform** to generate personalized Individual Development Plans from employee skill data
- Designed scalable backend APIs with **RBAC** for secure role-based access across Admin, HR, and Employee role
- Built interactive skill-gap dashboards using **data visualization components**, enabling HR managers to identify team development needs and make data-driven promotion decisions.

EDUCATION

University College of Engineering, Kanchipuram

Nov 2022 – Jun 2026

B.E Computer Science and Engineering

CGPA: 8.4 / 10

CERTIFICATION

NPTEL – Programming in Java — Elite (95%)

Jan – Apr 2026

ACHIEVEMENTS

Smart India Hackathon 2025 Winner, Naan Mudhalvan Hackathon 2025 Winner, Odoo Hackathon 2026 Finalist
